Profile

Dedicated Full Stack Developer with expertise in Laravel, React, and Blade. Skilled in building robust APIs, scalable backend architectures, and clean, responsive frontend interfaces. Proficient in implementing intuitive MVC structures and delivering secure, high-performance solutions. Passionate about leveraging AI tools to accelerate development, optimize workflows, and improve project quality. Continuously learning new technologies and collaborating on impactful digital projects.

Education

2022-present Bachelor Software & Informatics Engineering, Salahaddin University - Erbil, College of Engineering, Erbil

- Currently in the fourth stage of the program, building a strong foundation in software design principles and mathematics.
- Developing an understanding of artificial intelligence, security, networking, and server administration.
- Actively working on assignments and projects that focus on problem-solving and practical application of engineering concepts.

Self-Directed Learning, Online Courses & Tutorials

- Gained most of the knowledge in backend development, frontend development, web-security, and networking through self-paced online courses and tutorials with hands-on real-life projects.
- Completed multiple YouTube courses covering PHP, Laravel, React, Blade, JSON APIs, MySQL, and server-side development.

Skills

Languages & Frameworks PHP, Laravel, React, Blade, MySQL

Tools & Concepts RESTful APIs, Swagger Documentation, Cloudflare, OneSignal, Firebase, Git and GitHub, Filament (Laravel)

AI Tools & Workflow Applying AI-powered tools to accelerate development, enhance code quality, and improve productivity.

Experience

Feb 2026-present Full Stack Developer (Part-time), Technobase Company

- Contributing to multiple production projects as a full stack developer, working across Laravel APIs, admin dashboards, frontend interfaces, and database-driven systems.
- Worked on projects including Shoplink SaaS, Pelistank application backend APIs, e-commerce management systems, and other internal and client solutions.
- Collaborating with the team to build scalable features, maintain clean code, improve workflows, and deliver reliable business-focused systems.

Dec 2025-Feb 2026 Full Stack Developer Intern, Technobase Company

- Completed a two-month internship focused on practical full stack development, Laravel backend workflows, frontend implementation, and real project collaboration.
- Gained hands-on experience with project structure, feature development, API implementation, debugging, and professional software development practices.

Projects

Stadium Booking Application

- Developed a complete backend API for managing stadium bookings, consumed by a Flutter application and an admin dashboard.
- Implemented role-based access, booking approvals, commission management for owners, secure authentication, notifications, and payment tracking.
- Built with Laravel API architecture, ensuring scalability, maintainability, and secure data handling.

Feedback System

- Developed a full-stack system to collect and manage feedback across Salahaddin University.
- Built with Laravel and MySQL, including role-based access for students, department admins, college admins, and university admins.
- Leveraged AI-assisted development tools to enhance efficiency and ensure clean, maintainable code.

Loan Management System

- Designed a system for a mobile store to automate loan tracking and installment management.
- Used Laravel with the Filament panel for a clean UI and reliable administrative workflows.
- Calculates monthly installments based on loan terms and tracks outstanding balances.

Department's Lectures

- Created a platform to organize and provide access to departmental lecture materials.
- Built with Laravel and Cloudflare for secure file storage.
- Lectures are organized by semester and subject for easy access.
